**Glass fiber-reinforced polybutylene terephthalate compound for parts with high surface quality**

**VESTODUR X7085 BK V306020** is a 45% glass fiber- reinforced, polymer-modified polybutylene terephthalate compound for injection molding.

The compound is suitable for parts that are subjected to high mechanical and thermal loads. Compared with commonly used glass fiber-reinforced PBT compounds with similar stiffness parts of VESTODUR X7085 have in particular a high surface quality.

VESTODUR X7085 BK V306020 is supplied as cylindrical pellets in polyethylene packaging.

For information, please follow the general recommendations in our flyer "VESTODUR® Polybutylene terephthalate - Compounds".

The use of colorants may affect property values.

Inside the original and undamaged packaging, the product has a shelf life of at least 2 years when stored in dry rooms at temperatures not exceeding 30°C.

The values presented are typical or average values, they do not constitute a specification.
