PA66 25% glass fibre reinforced injection moulding grade. Heat stabilized. Black colour.

Suitable for parts requiring medium stiffness, good mechanical resistance and excellent heat ageing properties retention.

The material is delivered in moisture-proof packaging ready for processing. Maximum recommended water content for best processing is 0.15%. Typical conditions with a desiccant drier: temperature 80 ° C, dew point -20 ° C or below, time 2-4 h or more. Special care must be taken to avoid moisture absorption and contamination with other polymers when adding regrind material. Colour variation and mechanical properties reduction may occur and should always be carefully monitored.
