

Product Texts

Intrinsic Viscosity - 0.5% in NMP 25°C: >0.5

Processing Recommendation Extrusion	Value	Unit	Test Standard
Pre-drying - Temperature	177	°C	-
Pre-drying - Time	3	h	-

Characteristics

Processing

Film Extrusion, Coating, Compression Molding

Delivery form

Powder

Special Characteristics

Flame retardant, Heat stabilized or stable to heat

Features

Blending Resin, Creep Resistance

Chemical Resistance

General Chemical Resistance

Regional Availability

North America, Europe, Asia Pacific, South and Central America, Near East/Africa
